## July, 2010

Enclosed is the regular JULY update of the CPC System. The database is valid until October 31, 2010. Install this update using the usual LODRUN command.

This version of the CPC System has been updated to include over 831,463 Canadian postal codes. This is an increase of over 310 postal codes from the previous update.

### CPC Enhancements for July

In this month's update you will find that our handling of RR (Rural Route) addresses is changed slightly. RR addresses which have previously been listed in the postal database as RR 1 will now in some cases have additional identifiers.

RR 1 STN MAIN and RR 16 LCD 1 are examples of how a RR may be listed now. In other cases you will still see just RR 1. This applies to all RR's, not just RR 1.

The CPC System will in many cases automatically add the additional information for you. RR 16 in London, ON will be returned to you as RR 16 LCD 1, the LCD 1 having been automatically added.

The following is a summary of this month's changes to Canada Post's database by address record type. This information provides insight into the volume and type of changes being made.

RECORD TYPE	RECORDS	ADDED	NO CHANGE	DELETED	TOTAL
STREET ADDRESS	(TYPE 1)	18782	1059377	18027	1096186
STREET SERVED BY ROUTE	(TYPE 2)	3697	154496	1904	160097
LOCK BOX	(TYPE 3)	77	20473	59	20609
ROUTE SERVICE	(TYPE 4)	43	5357	8	5408
GENERAL DELIVERY	(TYPE 5)	6	3291	7	3304
GRAND TOTAL		22605	1242994	20005	1285604

Notice that, although there are only 831,463 unique postal codes, there are over 1.28 million address records in Canada Post's database. This is because while a postal code may represent a single address, most postal codes represent a range of addresses on a street or in a city.
